AMIR HASHMI

Full-Stack AI Engineer

Lahore, Pakistan | +92 328 4136880 | amirhashmi017@gmail.com | github.com/AmirHashmi017 | linkedin.com/in/amirhashmi017

PROFESSIONAL SUMMARY

Full-Stack AI Engineer with 2+ years of experience building production-ready web applications and AI-powered systems across full-stack platforms, generative and agentic AI, workflow automation, and applied machine learning. Proficient in TypeScript, React, Next.js, Node.js, Express.js, MongoDB, and REST APIs, with hands-on expertise in LLM applications, RAG pipelines, and autonomous AI agents. Experienced with LangChain, LangGraph, LangSmith, MCP, vector databases, and n8n, with a strong focus on integrating AI capabilities into scalable full-stack products.

EXPERIENCE

Devanics — Full-Stack AI Engineer **July 2025 – Present**

Lahore, Pakistan

- Build and maintain 5 full-stack applications and modules using TypeScript, Node.js, Express.js, React, Next.js, and MongoDB (NoSQL).
- Design and implement RESTful APIs, backend services, authentication systems, and reusable frontend components.
- Engineer 3 AI agent and RAG-based systems using LLMs, LangChain, LangGraph, LangSmith, and MCP, implementing agentic workflows and persistent memory.
- Automate business systems with n8n, integrating LLMs, vector databases, OCR, voice AI, and web scraping tools.
- Contribute across the full software development lifecycle, from feature planning and API integration to debugging, testing, and deployment.

SincSol — Web Developer **Sep 2024 – Nov 2024**

Lahore, Pakistan

- Developed 2+ web applications using C#, ASP.NET Core Razor Pages, JavaScript, and PostgreSQL.
- Integrated backend functionality and database logic across 5 application modules.
- Partnered with a 3-person development team to improve responsive user interfaces using React, HTML5, and CSS.

Ustadam — Web Development Intern **June 2024 – Aug 2024**

Lahore, Pakistan

- Created 15 dynamic web pages and backend functionality using ASP.NET Core Razor Pages and Microsoft SQL Server.
- Delivered functionality across 2+ application modules.
- Built 2 desktop utilities using C# and Windows Forms.

University of Engineering and Technology, Lahore — Teaching Assistant **Sep 2024 – May 2025**

Lahore, Pakistan

- Mentored 30+ students and led 15+ laboratory sessions in Programming Fundamentals and Object-Oriented Programming.
- Guided 30+ students through debugging, assignments, and technical problem-solving using C#, C++, Python, and SQL.

PROJECTS

Schesti – Construction Management Platform (Professional Project, Devanics)

- Contributed to full-stack development of a construction management platform, delivering backend services with TypeScript and frontend interfaces with React and Next.js.

Vorame – Traders Community Platform (Professional Project, Devanics)

- Architected backend logic using TypeScript and Express.js, and crafted dynamic frontend components using React for a traders community application.

Volvox – Generative & Agentic AI System

- Engineered a RAG-based AI application featuring autonomous agentic workflows using LangChain, LangGraph, LangSmith, and MCP.
- Implemented persistent memory, conditional and parallel execution, human-in-the-loop workflows, multi-agent orchestration, and vector database-backed retrieval.

AI Automation Systems – n8n Workflows

- Designed automation workflows for document vectorization, semantic search, OCR processing, voice AI agents, and web scraping.
- Established Slack and Telegram bot connections alongside Google Workspace automations that combine LLM and vector database tooling.

AI-Powered HR Hiring Automation – End-to-End Recruitment Workflow

- Launched an AI-driven hiring automation system that generates a complete job posting from a submitted job description and publishes it across job platforms.
- Incorporated AI-based CV/resume shortlisting to screen and rank candidates against job requirements, reducing manual review effort.
- Streamlined candidate communication by generating and sending status updates (shortlisted, rejected, next steps) using LLM integrations.
- Orchestrated the end-to-end recruitment workflow using LangGraph, integrating LangChain-powered AI components across job posting, candidate screening, and candidate communication stages.

Machine Learning & NLP Projects

- Developed and evaluated supervised learning, NLP, and deep learning models for classification, prediction, sentiment analysis, and sequence modeling using Scikit-learn, TensorFlow, and NLTK, with selected models deployed on AWS.

TECHNICAL SKILLS

Programming: TypeScript, JavaScript, Python, C#, C++, SQL

Frontend & Full-Stack: React, Next.js, MERN Stack, HTML5, CSS

Backend & APIs: Node.js, Express.js, ASP.NET Core, Flask, FastAPI, REST APIs

Software Development: Software Development Lifecycle (SDLC), Business Systems Automation, Agile Collaboration, Testing & Debugging

Generative & Agentic AI: Artificial Intelligence (AI), LLMs, LangChain, LangGraph, LangSmith, MCP, RAG, AI Agents, Agentic Workflows

AI Automation & Integration: n8n, LLM Integration, OCR, Voice AI, Web Scraping, Workflow Automation

Machine Learning & NLP: Scikit-learn, TensorFlow, Pandas, NumPy, Matplotlib, NLTK, Transformers

Databases: SQL Databases (Microsoft SQL Server, PostgreSQL, MySQL), NoSQL (MongoDB), Database Design

Cloud Infrastructure & DevOps: AWS, Docker, CI/CD, Git, GitHub, Postman

Soft Skills: Communication Skills, Team Collaboration, Reliability, Adaptability, Time Management, Persistence

EDUCATION

University of Engineering and Technology, Lahore **Expected 2027**

BS Computer Science — CGPA: 3.83/4.00

Relevant Coursework: Artificial Intelligence / Machine Learning, Data Structures and Algorithms, Object-Oriented Programming, Database Systems, Programming

Punjab Group of Colleges, Lahore **2021 – 2023**

Intermediate in Computer Sciences (ICS) — Marks: 946/1100

LANGUAGES

English – Professional Working Proficiency | Urdu – Native / Fluent | Punjabi – Conversational / Fluent
